# THE NATURAL®

The perfect fit for every foot

The new Natural® has been developed as a natural extension of the body and incorporates all of the clever techniques that are so characteristic of the extensive Bata Industrials safety footwear range. This has produced a lightweight shoe that is suitable for every foot and working environment thanks to its perfect fit. In addition, the completely new upper developed in collaboration with a fashion designer also responds to the desire of the professional to look stylish and presentable on the work floor.

The models illustrated represent only part of our collection.

Bata Industrials has improved the sole technology in relation to the preceding collection. Its new The Natural® collection features both models with a dual density PU-sole and models with a TriTech®-sole. Each sole has a different profile that is adapted to the qualities of the sole materials used in order to create optimum stability and slip resistance.

Dual density PU-sole

### Four width system

The last is the basis for a good fit. That is why most of The Natural models are available in four width fittings: N, W, XW and XXW. This means that Bata Industrials can provide the perfect fit for every wearer thanks to its extensive expertise in footwear.

### Tunnelsystem®

The built-in shock absorber spares the joints, keeps the wearer upright and ensures perfect stability.
