

TOGETHER WE GO TO THE EXTREME.

Extreme safety for extreme conditions.

BATA INDUSTRIALS
THE SAFETY SHOE

EXTREME SAFETY FOR EXTREME CONDITIONS

For more than 200 years Mammoet has been carrying out the most challenging lifting and transport operations all over the world. Mammoet's solutions are focused on the petrochemical, offshore, power, maritime and civil-engineering sectors. Over the years Mammoet has gained worldwide recognition for its determination to achieve the unachievable, no matter how remote the location and how harsh the conditions.

Over 5,000 Mammoet professionals are the driving force behind the success of the company. Therefore, Mammoet is making sure that all workwear collections -including footwear- are extensively tested by each professional, who works in the harshest of climates and under the most extreme conditions – ranging from extremely cold temperatures in hard-to-reach no-man's land to the sweltering heat of sand plains. As a result, each collection provides the best protection while working under the most extreme conditions.

For a new footwear collection Mammoet and Bata Industrials proudly joined forces to achieve a shared goal: to give professionals the best safety footwear there is. Both companies have a long history as global leaders in their respective fields. Both headquarters of Mammoet and Bata Industrials are established in the Netherlands, from where they strive to maximize the value of their global footprint. Bata Industrials is part of the Bata Shoe Organisation, the world's largest shoe manufacturer. All the more the reason to join forces and develop a new footwear collection, that complies with the highest safety regulations for safety shoes.

To continually push the boundaries of safety, health and comfort, Bata Industrials combines its extensive expert knowledge and experience with first-class materials, the most advanced techniques and the latest insights in design and comfort. Bata's mission is clear: to guarantee the safety of professionals worldwide. Bata Industrials has built its reputation as the global leader in safety footwear on its commitment to this mission. Developed together with Bata Industrials, Mammoet's new footwear collection provides the best protection for professionals working under all conditions, no matter how extreme.

Mammoet's newest safety footwear range has been tested by our own professionals and approved with respect to their quality, comfort, safety, and functionality. The complete shoe collection is designed to meet the highest expectations of professionals who work in the most challenging environments and under the most extreme conditions, such as (heavy) industry, power generation, petrochemical and offshore locations.

Mammoet professionals wear the company's safety shoes proudly. We believe that every professional should have access to the best protection there is. That is why this unique collection is available for all professionals worldwide, whether they work for Mammoet or not. Fun fact: The Mammoet identity is fully integrated in the design of the shoes. If you take a close look, you will discover Mammoet's equipment in the smallest details.
